NARRATIVE DESIGNER & SYSTEMS WRITER

Specializing in dynamic quest architecture, dialogue economy, and systemic world-building.

Bridges technical systems logic with high-impact dramatic pacing. Proven ability to design branching questlines, calibrate multi-tier player progression, and implement reactive narrative structures. Deep background in theatrical cadence, quantitative mechanics, and interdisciplinary world design.

CORE COMPETENCIES

- **Narrative Design:** Branching Narrative Paths, Quest Flow Architecture, World Bibles, Environmental Storytelling.
- **Game Writing:** Character-Driven Dialogue, Systemic Barks, Item Descriptions, Quest Logs, Flavor Text.

RELEVANT NARRATIVE DESIGN & WRITING EXPERIENCE

Narrative Systems Architect & Lead Author | Independent 2026

- Engineered comprehensive narrative systems frameworks codifying pacing, structural tension, and character progression across long-form speculative and realistic fiction.
- Formulated the **PHRASE WEB** framework: a 23-point systemic design model governing environmental friction, institutional world-building (PESTELI criteria), and reactive narrative pacing.
- Integrated mathematical constraints and systems-level state changes into narrative mechanics to ensure player actions trigger earned structural consequences rather than static exposition.

Topliner & Lyrical Systems Designer | Independent / Moniker Projects 2024

- Developed [Poethics](#), a systematic methodology applying algorithmic structures, quantitative constraints, and multi-syllabic density to lyricism and audio-visual timing.
- Composed thematic narrative anthems and vocal tracks, balancing percussive syllable cadence with emotional subtext for cross-media properties.
- Designed multi-track narrative voice layouts, utilizing speech rhythm and vocal attacks to convey urgency, suspense, and character motivations.

EDUCATION

Lone Star College – North Harris: Medical Assisting (Currently Enrolled)
